

Your pet is here for a spay/neuter. This includes a pre-surgical examination, general anesthesia, surgery, and pain medications during and after the procedure. Please complete all questions on this form.

Place Label Here	What procedure is your pet here for today?
	Has your pet eaten any food or treats today? <input type="checkbox"/> Yes <input type="checkbox"/> No If yes, what time: _____ AM PM
	Would you like a complimentary nail trim during the procedure? (FREE) <input type="checkbox"/> Yes <input type="checkbox"/> No
Is your pet on any medications and when did you last administer meds?	

Pre-Anesthetic Blood Panel: We highly recommend having blood work performed prior to anesthesia. This gives us information regarding your pet's overall health, gives us a baseline of normal values to compare to in the future, and helps detect early signs of disease such as diabetes or kidney issues. If there is a concern moving forward with surgery, we will contact you with results first.

Would you like a pre-anesthetic blood panel? Yes No Cost \$135

Vaccinations: If your pet is due for vaccinations, we can administer while in the clinic. If records are not provided prior to drop off or you select yes, these vaccinations are administered. Dogs: Dapp, Rabies, LEPTO // Cats: FVRCP-Leuk, Rabies

Would you like any due vaccinations updated? Yes No Cost \$30-\$40 each

Lump Removal: If the doctor recommends histopathology (study/diagnosis of tissues) to determine if a lump is cancerous, would you like this done?

Would you like a histopathology report? Yes No Cost \$165

E-collar: To protect the incision, we recommend you purchase an Elizabethan collar (E-collar). These are the most effective protection and limit follow up or emergency visits which could result in unexpected costs.

Would you like an E-collar? Yes No Cost \$10-\$20

Follow Up Appointments: Depending on the surgery done, there may be necessary follow up appointments for suture removals, drain removal, splint changes, or like - these are not included in the surgery cost paid. These follow up appointments need to be done with veterinary oversight to avoid unexpected costs and proper healing.

I understand follow up care may be needed. Yes No Cost varies

Please Initial	Sedation or general anesthesia will be required. I understand that my pet's procedure may require general anesthesia and /or sedation. All precautions will be taken to ensure the safety of my pet. However, I have been informed of the possible risks associated with anesthesia / sedation, and that I am responsible for associated charges. I officially release Valley Veterinary Clinic of any liability pertaining to this procedure (before, during, or after surgery).
